

Tim's "We are here" sheet

31Mar07

To my Partners:

Between the annual report and our proxy circular, I think I have given you a fair amount to read. In other words, I will keep this short!

During the first quarter, the cash levels of both funds rose somewhat. This was due to the sale of several securities including Fairfax Financial and 2 of our 4 Japanese broadcasting stocks. There were no significant new investments.

Administratively it has been a busy period but that is not something I suspect you particularly care about. I am relieved we have finally completed our documentation for the merger of the Trust and the LP and our meeting is tentatively scheduled for May 22nd at the Four Seasons in Vancouver. I do want to stress that this will be an administrative meeting and I do not intend to put on a marketing blitz although I am happy to chat with you. There will be a light buffet lunch served.

The McElvaine Investment Trust:

The 31Mar07 price for the Trust was \$27.79. This represents a gain for the first 3 months of 2007, net of all fees and expenses, of 2.3%. During this period, the TSX Total Return index rose by 2.6%.

The McElvaine Limited Partnership:

The 31Mar07 price for the LP was \$48.87. This represents a gain for the first 3 months of 2007, net of all fees and expenses, of 3.5%. By comparison, the Morgan Stanley World Index (in Canadian dollars) rose by 1.5% over the same period while the TSX Total Return Index rose by 2.6%.

Conclusion:

As always, many thanks for all your support and confidence. I appreciate your trust.

All the best,

Tim McElvaine

Notes:

- As the Trust invests primarily in Canadian securities, we have compared its performance to that of the S&P/TSX Composite Total Return Index (formerly the TSX 300 Total Return Index). This index tracks changes in the share price of 300 of the largest companies (by market capitalization) listed on the Toronto Stock Exchange (and includes the return from reinvested dividends). These companies represent a broad range of industries.
- The investment objective of the Partnership does not restrict the countries in which it may invest. Accordingly, we have compared its performance to the Morgan Stanley Capital International World Index. This index is designed to measure the performance of equity markets in countries that are considered to have "developed" equity markets. **You should understand that the Partnership's portfolio may differ substantially from the investments reflected in this index.**
- "Pre-fee Return" is the increase in the asset value during the period after the deduction of all expenses, other than the management fee and performance incentive fee, and applicable GST, and for the Trust includes distributions reinvested in additional units. The Pre-fee Return gives you the best indication of how the funds' investments have performed. However, the "Net Return" is a better indicator of the returns actually earned by investors.
- "Net Return" is the increase in the net asset value of the Trust or the LP during the period and for the Trust includes distributions reinvested in additional units.
- We have compared the Trust's performance to the average return of Canadian equity funds, and have compared the LP's performance to the average return of Global equity funds, as published on the globefund.com website operated by The Globe and Mail and CTVglobemedia. Copyright 2007 CTVglobemedia Publishing Inc., its affiliates and/or licensors.
- "T-bill Rate" is the average of the monthly 90-day treasury bill rates during the year. "Deposit Rate" refers to the average 30-day deposit rate paid by a Canadian Bank. We have included these rates because they are used to determine whether the Portfolio Adviser receives a performance incentive fee.
- "Average Cash Balance" is the average of the month-end cash and short-term bond balances. For example, the 1997 pre-fee return for the Trust of 16.8% was earned while the portfolio was on average only 41% invested.
- The performance table for the Trust excludes the 3 months from 27Sept96 to 31Dec96 (startup period). During this period, the Trust returned 3.1%.
- The predecessor to the LP, Peter Cundill LP, was formed in 1979 and had a 21-year compound rate of return of 13.5%.
- It is important that you understand that performance is yesterday's news and you should be careful about using it as a guide to tomorrow. The figures above are unaudited and in many circumstances, simply our estimates.**
